

NEXTPPOINT CASE CHRONOLOGY

The key to winning a case is crafting a compelling story. That's the philosophy our experts have developed from their years of firsthand trial experience. Nextpoint's new Case Chronology feature makes it easier for our users to build that winning story.

In Case Chronology, users categorize evidence around the **key elements** of a case:

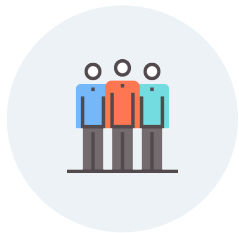

ISSUES

Those vital questions of law on which the court must rule

FACTS

Used to underscore the anatomy of a dispute, including important events, legal claims and defenses of each party

PEOPLE

Important individuals or organizations in a matter

Unveil Your Case Chronology

After assigning **Facts**, **Issues** and **People** to pieces of document evidence, users can sort Facts by date to view a chronological grid that depicts the case story and associated evidence.

I have found Nextpoint to be the most cost effective, comprehensible, mobile, and user-friendly case management application.

VISUAL TIMELINE BUILDER

As users weave a web of case connections, they should be able to examine and interpret them in simple, straightforward ways. That's why users can now transform their story into a visual timeline.

Nextpoint has saved us countless hours navigating through a large litigation database.

EVIDENCE DASHBOARD

The Evidence Dashboard provides a visual space for users to watch their story unfold and track the progress of their case as they build it in Case Chronology.

Your Dashboard Snapshots

- * Fact Overview
- * Top Tagged People
- * Your Favorite Folders
- * Top Document Issues
- * Most Viewed Docs
- * Deponents and
- * Case Notes
- * Document Overview
- * Linked Exhibits

Nextpoint provides powerful features for every aspect of litigation, from early case assessment all the way through trial preparation.
