UNIQUELY DATA-DRIVEN LEGAL SERVICES

NextpointLawGroup.com

Corporate Discovery as a Service

An on-demand ediscovery resource for
corporate legal departments

**We bring the people, process, and technology –
without the hosting fees.**

On-Demand Services

We can handle preservation, collection and productions. We provide as much or as little assistance as you need. Pay for what you need, when you need it.

Expert Support

If you need more, our team of experienced litigators, data consultants and project managers help you manage large amounts of data. We utilize tools such as data mining, near-duplicate detection, predictive coding, onshore review, and offshore review to handle those budget-challenging projects. We also advise on ESI protocols and provide expert testimony.

Teamwork

We work with other law firms all over the U.S. in a variety of capacities. We don't compete with your lead counsel. We support them by providing expertise and efficiencies in addressing the challenges of ediscovery.

A TURNKEY DISCOVERY SOLUTION

Tech-Enabled, Data-Driven Legal Services

Nextpoint Law Group is a law firm rooted in the Nextpoint professional services organization. Together with Nextpoint software, we deliver a comprehensive ediscovery solution powered by cutting-edge technology.

Corporate eDiscovery Support

Experts + Process + Technology
No project too big. No project too small.

Our experienced team of litigators, data consultants, and project managers brings best-in-class technology to make a real impact on your department's effectiveness and budget.

Discovery Counsel

Coordinating all efforts with in-house counsel, outside counsel, business stakeholders and IT for data identification, preservation, collection and review. No hosting fees and flexible fee structures.

Early Data Assessment

A cost-effective solution to sifting through voluminous amounts of data at an early stage to identify strengths, weaknesses, costs and potential outcomes for your matter.

Data Collection & Preservation

Assistance in identifying, preserving, and collecting data from sources including Slack, MS Teams, cloud-based storage systems, Microsoft/Office 365, Google Workspace, and more.

Information Governance & Data Mapping

Addressing data risks **before** litigation hits by assessing value and risks in the context of the company's information lifecycle.

Corporate Litigation Services

Tech-enabled expert services that up your game without busting your budget

Our experienced team of litigators, data consultants, and project managers will take on those hard-to-budget tasks that can make a big impact.

Internal Investigations

Whether it's HVLR or high-risk, we can work with you and lead counsel to collect data, interview witnesses, and draft reports. By combining cutting edge technology with our legal expertise, we offer an efficient turnkey approach.

Subpoena Response

Responding to third-party requests can be a drain on resources across the organization. We offer a comprehensive approach for intake, data collection, objections, production, and fee collection from the issuer.

Early Case Assessment

We cost-effectively analyze the data, the law and the financials to develop a strategy based upon the facts, not just our best guess. You can know where you are going **before** investing too much into the dispute.

Affirmative Claims Recovery

Legal departments are finding that they can be revenue-generating, not just cost centers. Instead of leaving money on the table by failing to pursue small claims, we can collect data, evaluate legal claims, undertake a financial analysis, and then pursue claims on a full or partial contingency.

Judgment Enforcement

Whether it's a default or a hard won jury verdict, obtaining the judgment is often only half the battle. Monetizing that judgment can involve many additional steps. By partnering with top-tier law firms, we have global reach to pursue assets wherever they may be. And given our innovative approach, we can do so in a cost-effective manner.
